CANADIAN JOURNAL OF BIOCHEMISTRY
JOURNAL CANADIEN DE BIOCHIMIE

VOLUME 52

AUTHOR INDEX/INDEX DES AUTEURS

Achuta Murthy, P. N.
In vitro synthesis of propionyl-CoA holocarboxylase by a partially purified mitochondrial preparation from biotin-deficient chicken liver. P. N. Achuta Murthy and S. P. Mistry, 800.

Anderson, S.
A comparative study of the relative ease of thermolytic depurination *vs.* depyrimidination in 2′-deoxynucleosides. P. G. Olafsson, A. M. Bryan, G. C. Davis, and S. Anderson, 997.

Armstrong, D. T.
Steroid metabolism by the immature rat testis. W. H. Moger and D. T. Armstrong, 744.

Avramovic-Zikic, O.
Evidence for an essential carboxyl group in glycogen phosphorylase. O. Avramovic-Zikic, W. C. Breidenbach, and N. B. Madsen, 146.

Baer, E.
Phosphonolipids. XXVI. Mixed-acid phosphonocephalins: synthesis of α′-stearoyl-β-oleoyl-L-α-glyceryl-(2-aminoethyl)phosphonate. E. Baer, 570.
Phosphonolipids. XXVII. Synthesis of *O*-(2-aminoethyl)phosphono-L-serine and its stereoisomer. E. Baer and J. T. Eber, 718.

Bailey, D. J.
Electrophoretic studies of the proteins of rat liver endoplasmic reticulum. D. J. Bailey, R. K. Murray, and F. S. Rolleston, 1003.

Baker, G. B.
The subcellular distribution of some monoamines following their intraventricular injection into the rat. A. A. Boulton and G. B. Baker, 288.

Banjo, B.
Studies on the mechanism and reversal of the phospholipase-A_2 inactivation of D-glucose uptake by isolated human erythrocyte membranes. B. Banjo, C. Walker, R. Rohrlick, and A. Kahlenberg, 1097.

Becker, A.
Terminal cross-linking of DNA catalyzed by an enzyme system containing DNA ligase, DNA polymerase, and exonuclease of bacteriophage T7. P. Sadowski, A. McGeer, and A. Becker, 525.

Beers, P. C.
Biosynthesis of the diguanosine nucleotides. I. Purification and properties of an enzyme from yolk platelets of brine shrimp embryos. A. H. Warner, P. C. Beers, and F. L. Huang, 231.

Behrisch, H. W.
Regulatory properties of pyruvate kinase from liver of the summer-active Arctic ground squirrel. H. W. Behrisch and C. E. Johnson, 547.
Temperature and the regulation of enzyme activity in the hibernator. Isoenzymes of liver pyruvate kinase from the hibernating and nonhibernating Arctic ground squirrel. H. W. Behrisch, 894.

Bergeron, L.
Purification de la chymotrypsine A de porc, par élution sélective en chromatographie d'affinité. L. Bergeron et E. de Médicis, 423.

Bernard, E. A.
Protein kinases in testes of adult and prepuberal rats. E. A. Bernard and G. F. Wassermann, 563.

Bernstein, H. J.
Structural studies of bacteriorhodopsin from *Halobacterium cutirubrum* by resonance Raman spectroscopy. R. Mendelsohn, A. L. Verma, H. J. Bernstein, and M. Kates, 774.

Bertagna, X.
Biosynthèse "*in vitro*" de l'hormone béta-lipotropique de boeuf. X. Bertagna, M. Lis, C. Gilardeau et M. Chrétien, 349.

Bewley, J. D.
The site of protein synthesis in the moss *Tortula ruralis* on recovery from desiccation. E. B. Tucker and J. D. Bewley, 345.

Blanchaer, M. C.
Sarcolemmal ATPase activities in normal and BIO 14.6 dystrophic hamster skeletal muscle. K. Wrogemann, B. E. Jacobson, and M. C. Blanchaer, 500.
Differing populations of mitochondria isolated from the skeletal muscle of normal and dystrophic hamsters. B. J. Mezon, K. Wrogemann, and M. C. Blanchaer, 1024.

Boileau, G.
Streptomycin resistance and ribosomal proteins: amino acid substitutions in the *str* protein of one streptomycin-resistant mutant of *Escherichia coli* K12 after mutagenesis with ethyl methanesulfonate. L. Brakier-Gingras, L. Lacoste, and G. Boileau, 304.

Boon, J.
Properties of P503 (Prototetrahydroporphyrin IX) in cells and extracts of *Saccharomyces cerevisiae*. R. Poulson, J. Boon, and W. J. Polglase, 21.

Boonsaeng, V.
Succinate dehydrogenases of *Mucor rouxii* and *Penicillium duponti*. V. Boonsaeng, P. A. Sullivan, and M. G. Shepherd, 751.

Boulton, A. A.
The subcellular distribution of some monoamines following their intraventricular injection into the rat. A. A. Boulton and G. B. Baker, 288.
Identification and distribution of *p*-tyramine in the rat. S. R. Philips, D. A. Durden, and A. A. Boulton, 366.
Distribution, metabolism, and disappearance of intraventricularly injected *p*-tyramine in the rat. P. H. Wu and A. A. Boulton, 374.
Identification and distribution of tryptamine in the rat. S. R. Philips, D. A. Durden, and A. A. Boulton, 447.

Bourgaux, P.
Replicating DNA of adenovirus type 2. D. Bourgaux-Ramoisy, J. Robin, and P. Bourgaux, 181.

Bourgaux-Ramoisy, D.
Replicating DNA of adenovirus type 2. D. Bourgaux-Ramoisy, J. Robin, and P. Bourgaux, 181.

Brakier-Gingras, L.
Streptomycin resistance and ribosomal proteins: amino acid substitutions in the *str* protein of one streptomycin-resistant mutant of *Escherichia coli* K12 after mutagenesis with ethyl methanesulfonate. L. Brakier-Gingras, L. Lacoste, and G. Boileau, 304.

Branda, L. A.
Plasma oxytocinase: the synthesis and biological properties of the first product of the degradation of oxytocin by this enzyme. B. M. Ferrier, J. M. Hendrie, and L. A. Branda, 60.

Brazeau, P.
Isolation of somatostatin (a somatotropin release inhibiting factor) of ovine hypothalamic origin. P. Brazeau, W. Vale, R. Guillemin, and R. Burgus, 1067.

Breidenbach, W. C.
Evidence for an essential carboxyl group in glycogen phosphorylase. O. Avramovic-Zikic, W. C. Breidenbach, and N. B. Madsen, 146.

Bridger, W. A.
Some physical parameters of succinyl-coenzyme A synthetase of *Escherichia coli*. A. Krebs and W. A. Bridger, 594.

Brosnan, J. T.
Localization of phosphate-independent glutaminase in the brush border of rat kidney cortex. J. Kalra and J. T. Brosnan, 762.

Brown, G. M.
Antibodies to indolealkylamines: serotonin and melatonin. L. J. Grota and G. M. Brown, 196.

Brown, J. C.
Correction to the amino acid sequence of porcine motilin. H. Schubert and J. C. Brown, 7.

Brown, S. A.
Isolation of dimethylallylpyrophosphate: umbelliferone dimethylallyltransferase from *Ruta graveolens*. B. E. Ellis and S. A. Brown, 734.

Brown, W. V.
Incorporation of sialic acid into sialidase-treated apolipoprotein of human, very low density lipoprotein by a pork liver sialyltransferase. S. Wetmore, R. W. Mahley, W. V. Brown, and H. Schachter, 655.

Brox, L.
Purine and pyrimidine pool sizes and purine base utilization in human lymphocytes and cultured lymphoblasts. T. Fields and L. Brox, 441.

Brubacher, L. J.
Evidence for nonproductive binding subsites within the active site of papain. B. R. Glick and L. J. Brubacher, 877.

Bryan, A. M.
A comparative study of the relative ease of thermolytic depurination *vs.* depyrimidation in 2′-deoxynucleosides. P. G. Olafsson, A. M. Bryan, G. C. Davis, and S. Anderson, 997.

Bryson, J.
γ-Glutamyl transpeptidase of rat kidney: some properties and kinetic constants. J. S. Elce, J. Bryson, and L. G. McGirr, 33.

Buchanan, G. W.
Estimation of the water of hydration in wintering wheat leaves by proton magnetic resonance. F. D. H. Macdowall and G. W. Buchanan, 652.

Bundle, D. R.
The synthesis of 2-acetamido-2-deoxy-α-D-glucopyranose 4-phosphate. D. R. Bundle and H. J. Jennings, 723.

Burgus, R.
Isolation of somatostatin (a somatotropin release inhibiting factor) of ovine hypothalamic origin. P. Brazeau, W. Vale, R. Guillemin, and R. Burgus, 1067.

Burton, A. F.
Studies on corticosterone–receptor complexes from mouse placenta. M. D. Wong and A. F. Burton, 190.

Campbell, J. N.
Metabolism and transport of purine nucleosides by membrane preparations of *Micrococcus sodonensis*. M. A. Pickard, L. Phillippe, and J. N. Campbell, 83.

Carabello, F. B.
Role of tocopherol in the reduction of mitochondrial NAD. F. B. Carabello, 679.

Cardemil, E.
Wide-angle X-ray-diffraction studies of the bovine-erythrocyte membrane. Treatment with sodium chloride, deoxycholate, and lipid solvents. G. W. Dresdner, H. Cid-Dresdner, L. Meza, and E. Cardemil, 1044.

Carey, P. R.
The resonance Raman spectrum of the metalloprotein ovotransferrin. P. R. Carey and N. M. Young, 273.

Carpenter, F. H.
Catalysis of exchange of oxygen into and out of L-leucine by leucine aminopeptidase. J. A. Wells, G. L. Glasser, and F. H. Carpenter, 142.

Cedergren, R. J.
Origine de l'inosine dans les tRNA de levure. M. Dugré et R. J. Cedergren, 417.

Chen, C. M.
Biological activity of ribose-modified N^6-(Δ^2-isopentenyl)adenosine derivative. C. M. Chen, O. C. Smith, and G. F. Hartnell, 1154.

Chester Jones, I.
Some aspects of the dietary sodium intake on the regulation of aldosterone biosynthesis in rat adrenals. J.-G. Lehoux, T. Sandor, I. W. Henderson, and I. Chester Jones, 1.

Choi, C.
Synthesis of peptides by the solid phase method. I. Tetradecapeptide renin substrate and intermediate peptides, nonapeptides, and fragments of angiotensin II. W. K. Park, C. Choi, F. Rioux, and D. Regoli, 106.
Synthesis of peptides with the solid phase method. II. Octapeptide analogues of angiotensin II. W. K. Park, C. Choi, F. Rioux, and D. Regoli, 113.

Chrétien, M.
Biosynthèse "*in vitro*" de l'hormone béta-lipotropique de boeuf. X. Bertagna, M. Lis, C. Gilardeau et M. Chrétien, 349.
Sequence determination of a protein with *N*-terminal glutamic acid after modification of carboxyl groups with carbodiimide as the coupling agent. C. Gilardeau and M. Chrétien, 560.

Cid-Dresdner, H.
Wide-angle X-ray diffraction studies of the bovine-erythrocyte membrane. Treatment with sodium chloride, deoxycholate, and lipid solvents. G. W. Dresdner, H. Cid-Dresdner, L. Meza, and E. Cardemil, 1044.

Clarke, J. T. R.
Studies on acid hydrolases in embryonic rabbit brain: prenatal ontogeny of cerebral glycosidases. J. T. R. Clarke, 294.

Codding, P. W.
The 4.5 Å resolution structure of a bacterial serine protease from *Streptomyces griseus*. P. W. Codding, L. T. J. Delbaere, K. Hayakawa, W. L. B. Hutcheon, M. N. G. James, and L. Jurášek, 208.

Contaxis, C. C.
A study on the conformational properties of glucagon in the presence of glycols. C. C. Contaxis and R. M. Epand, 456.

Cruickshank, W. H.
Diagonal chromatography for the selective purification of tyrosyl peptides. W. H. Cruickshank, B. L. Malchy, and H. Kaplan, 1013.

Daigneault, R.
Purification of Escherichia coli chloramphenicol acetyltransferase by affinity chromatography. M. Guitard and R. Daigneault, 1087.

Davidson, J. B.
Evidence for the biosynthetic difference between isolated mitochondria and microsomes from guinea-pig and rat liver regarding lysophosphatidic acid, phosphatidic acid, CDP-diglyceride, phosphatidylglycerol, and cardiolipin. J. B. Davidson and N. Z. Stanacev, 936.

Davis, G. C.
A comparative study of the relative ease of thermolytic depurination *vs.* depyrimidination in 2'-deoxynucleosides. P. G. Olafsson, A. M. Bryan, G. C. Davis, and S. Anderson, 997.

Delahunty, T.
Glycosylation of β-lipoprotein and the possible role of choline derivatives. T. Delahunty and S. Mookerjea, 359.

Delbaere, L. T. J.
The 4.5 Å resolution structure of a bacterial serine protease from *Streptomyces griseus*. P. W. Codding, L. T. J. Delbaere, K. Hayakawa, W. L. B. Hutcheon, M. N. G. James, and L. Jurášek, 208.

de Médicis, E.
Purification de la chymotrypsine A de porc, par élution sélective en chromatographie d'affinité. L. Bergeron et E. de Médicis, 423.

Dimant, E.
The hyperglycemic effect of 1-deoxy-D-*manno*-heptulose. Inhibition of hexokinase, glucokinase, and insulin release *in vitro*. B. Leshem, Y. Sharoni, and E. Dimant, 1078.

Dixon, G. H.
Amino acid analyses of chymotrypsin-like proteases from the sea anemone (*Metridium senile*). K. J. Stevenson, D. Gibson, and G. H. Dixon, 93.
Enzymatic modifications of the protamines. II. Separation and characterization of phosphorylated species of protamines from trout testis. A. J. Louie and G. H. Dixon, 536.

Dörnemann, D.
Chain elongation of aromatic amino acids: the role of 2-benzylmalic acid in the biosyntheses of a C_6C_4 amino acid and a C_6C_3 mustard oil glucoside. D. Dörnemann, W. Löffelhardt, and H. Kindl, 916.

Dorrington, K. J.
An atypical human immunoglobulin G with deletions in both heavy and light chains. Studies of the conformation and the *in vitro* recombination of the isolated subunits. M. E. Percy and K. J. Dorrington, 610.

Dresdner, G. W.
Wide-angle X-ray-diffraction studies of the bovine-erythrocyte membrane. Treatment with sodium chloride, deoxycholate, and lipid solvents. G. W. Dresdner, H. Cid-Dresdner, L. Meza, and E. Cardemil, 1044.

Drouin, D.
Stability of secretory granules containing growth hormone and prolactin from bovine anterior pituitary gland. A. Lemay, F. Labrie, and D. Drouin, 327.

Dugré, M.
Origine de l'inosine dans les tRNA de levure. M. Dugré et R. J. Cedergren, 417.

Dupuis, G.
Reaction of alantolactone, an allergenic sesquiterpene lactone, with some amino acids. Resultant loss of immunologic reactivity. G. Dupuis, J. C. Mitchell, and G. H. N. Towers, 575.

Durden, D. A.
Identification and distribution of *p*-tyramine in the rat. S. R. Philips, D. A. Durden, and A. A. Boulton, 366.
Identification and distribution of tryptamine in the rat. S. R. Philips, D. A. Durden, and A. A. Boulton, 447.

Eber, J. T.
Phosphonolipids. XXVII. Synthesis of *O*-(2-aminoethyl)phosphono-L-serine and its stereoisomer. E. Baer and J. T. Eber, 718.

Ecobichon, D. J.
Characterization of the esterases of feline serum. D. J. Ecobichon, 1073.

Elce, J. S.
γ-Glutamyl transpeptidase of rat kidney: some properties and kinetic constants. J. S. Elce, J. Bryson, and L. G. McGirr, 33.

Ellis, B. E.
Isolation of dimethylallylpyrophosphate: umbelliferone dimethylallyltransferase from *Ruta graveolens*. B. E. Ellis and S. A. Brown, 734.

Epand, R. M.
A study of the conformational properties of glucagon in the presence of glycols. C. C. Contaxis and R. M. Epand, 456.

Faber, A. J.
Synthesis of albumin with exogenous mouse-liver messenger RNA in a homologous cell-free system. A. J. Faber, S. H. Miall, and T. Tamaoki, 429.

Ferrier, B. M.
Plasma oxytocinase: the synthesis and biological properties of the first product of the degradation of oxytocin by this enzyme. B. M. Ferrier, J. M. Hendrie, and L. A. Branda, 60.

Fields, T.
Purine and pyrimidine pool sizes and purine base utilization in human lymphocytes and cultured lymphoblasts. T. Fields and L. Brox, 441.

Fox, I. H.
Phosphoribosyl pyrophosphate degradation in human tissues. I. H. Fox and P. J. Marchant, 1162.

Garewal, H. S.
Autoreduction of pure spinach cytochrome *f*: a light-dependent process inhibited by 3-(3,4-dichlorophenyl)-1,1-dimethyl urea. H. S. Garewal, A. L. Stuart, and A. R. Wasserman, 67.

Gaucher, G. M.
Physicochemical properties of thermomycolase, the thermostable, extracellular, serine protease of the fungus *Malbranchea pulchella*. G. Voordouw, G. M. Gaucher, and R. S. Roche, 981.

Gauthier, M.
Adenosine-3′,5′-monophosphate-dependent protein kinase from bovine anterior pituitary gland. III. Structural specificity of the ATP site of the catalytic subunit. S. Lemaire, F. Labrie, and M. Gauthier, 137.

Gibson, D.
Amino acid analyses of chymotrypsin-like proteases from the sea anemone (*Metridium senile*). K. J. Stevenson, D. Gibson, and G. H. Dixon, 93.

Giglio, J. R.
Conversion of pig prothrombin into thrombin: amino acid composition of the active enzyme. A. Rossi and J. R. Giglio, 336.

Gilardeau, C.
Biosynthèse "*in vitro*" de l'hormone béta-lipotropique de boeuf. X. Bertagna, M. Lis, C. Gilardeau et M. Chrétien, 349.
Sequence determination of a protein with *N*-terminal glutamic acid after modification of carboxyl groups with carbodiimide as the coupling agent. C. Gilardeau and M. Chrétien, 560.

Glasser, G. L.
Catalysis of exchange of oxygen into and out of L-leucine by leucine aminopeptidase. J. A. Wells, G. L. Glasser, and F. H. Carpenter, 142.

Glick, B. R.
Evidence for nonproductive binding subsites within the active site of papain. B. R. Glick and L. J. Brubacher, 877.

Graf, G.
The purification and properties of an amidohydrolase from soybean. R. E. Hoagland and G. Graf, 903.

Green, R. N.
Formation of estrogen glucosiduronates by human kidney homogenates. R. Hobkirk, R. N. Green, M. Nilsen, and B. A. Jennings, 9.
Direct conversion of 17β-estradiol-3-glucosiduronate and 17β-estradiol-3-sulfate to their 17-keto forms by human kidney homogenates. R. Hobkirk, R. N. Green, M. Nilsen, and B. A. Jennings, 15.

Grota, L. J.
Antibodies to indolealkylamines: serotonin and melatonin. L. J. Grota and G. M. Brown, 196.

Guillemin, R.
Isolation of somatostatin (a somatotropin release inhibiting factor) of ovine hypothalamic origin. P. Brazeau, W. Vale, R. Guillemin, and R. Burgus, 1067.

Guitard, M.
Purification of Escherichia coli chloramphenicol acetyltransferase by affinity chromatography. M. Guitard and R. Daigneault, 1087.

Gwilliam, C.
Isolation from rabbit urine of the 3-glucuronide-17-*N*-acetylglucosaminide of 17α-estradiol. C. Gwilliam, A. Paquet, D. G. Williamson, and D. S. Layne, 452.

Hahn, P.
The effects of catecholamines, glucagon, and diet on enzyme activities in brown fat and liver of the rat. P. Hahn and L. T. Kirby, 739.

Hall, R. H.
A cytokinin oxidase in *Zea mays*. C. D. Whitty and R. H. Hall, 789.
The RNA fractions of chromatin from L-cells. J. J. Monahan and R. H. Hall, 922.

Halperin, M. L.
Control of fatty acid synthesis in white adipose tissue by insulin: coordination between mitochondrial citrate transport and pyruvate dehydrogenase. C. M. Schiller, W. M. Taylor, and M. L. Halperin, 813.

Hartnell, G. F.
Biological activity of ribose-modified N^6-(Δ^2-isopentenyl)adenosine derivative. C. M. Chen, O. C. Smith, and G. F. Hartnell, 1154.

Hasnain, S.
The separation and partial purification of the soluble 17α- and 17β-hydroxysteroid dehydrogenases of rabbit liver. S. Hasnain and D. G. Williamson, 120.

Hatton, M. W. C.
Studies of the metabolism of asialotransferrins: potentiation of the catabolism of human asialotransferrin in the rabbit. E. Regoeczi, M. W. C. Hatton, and K.-L. Wong, 155.
Studies of the metabolism of asialotransferrins: the mechanism for the hypercatabolism of human asialotransferrin in the rabbit. E. Regoeczi and M. W. C. Hatton, 645.
Studies of the metabolism of asialotransferrins: relationship between the carbohydrate composition of bovine, canine, and porcine asialotransferrins and their metabolic behavior in the rabbit. M. W. C. Hatton, E. Regoeczi, and K.-L. Wong, 845.

Haug, A.
Effect of fatty acyl chain length on some structural and functional parameters of *Acholeplasma* membranes. L. Huang, D. D. Jaquet, and A. Haug, 483.
Lipid and temperature dependence of membrane-bound ATPase activity of *Acholeplasma laidlawii*. J.-C. Hsung, L. Huang, D. J. Hoy, and A. Haug, 974.

Hayakawa, K.
The 4.5 Å resolution structure of a bacterial serine protease from *Streptomyces griseus*. P. W. Codding, L. T. J. Delbaere, K. Hayakawa, W. L. B. Hutcheon, M. N. G. James, and L. Jurášek, 208.

Helleiner, C. W.
Circular dichroism spectra of DNA of high adenine plus thymine content. C. W. Helleiner and J. A. Verpoorte, 582.

Henderson, I. W.
Some aspects of the dietary sodium intake on the regulation of aldosterone biosynthesis in rat adrenals. J.-G. Lehoux, T. Sandor, I. W. Henderson, and I. Chester Jones, 1.

Henderson, J. F.
Effects of actinomycin D on purine ribonucleotide metabolism in Ehrlich ascites tumor cells *in vitro*. F. F. Snyder and J. F. Henderson, 263.

Hendrie, J. M.
Plasma oxytocinase: the synthesis and biological properties of the first product of the degradation of oxytocin by this enzyme. B. M. Ferrier, J. M. Hendrie, and L. A. Branda, 60.

Hew, C-L.
The identification of proinsulin-synthesizing polysomes in fetal bovine pancreas. C.-L. Hew and C. C. Yip, 959.

Hill, R. E.
Erratum: Biosynthesis of vitamin B_6. Incorporation of terminally labelled glucose. R. E. Hill and I. D. Spenser, 271.

Hillcoat, B. L.
Enzyme increase by folate and methotrexate in cultured mammalian cells. B. L. Hillcoat and L. Marshall, 1132.

Himms-Hagen, J.
Changes in the adenyl cyclase system of skeletal muscle of cold-acclimated rats. M. Muirhead and J. Himms-Hagen, 176.
Urinary excretion of cyclic AMP by cold-acclimated rats. M. Muirhead, A. Inglis, and J. Himms-Hagen, 414.

Hirsch, G. H.
Effects of potassium depletion in rats on renal organic ion transport. G. H. Hirsch, 90.

Hoagland, R. E.
The purification and properties of an amidohydrolase from soybean. R. E. Hoagland and G. Graf, 903.

Hobkirk, R.
Formation of estrogen glucosiduronates by human kidney homogenates. R. Hobkirk, R. N. Green, M. Nilsen, and B. A. Jennings, 9.
Direct conversion of 17β-estradiol-3-glucosiduronate and 17β-estradiol-3-sulfate to their 17-keto forms by human kidney homogenates. R. Hobkirk, R. N. Green, M. Nilsen, and B. A. Jennings, 15.

Hofmann, T.
The inactivation of penicillopepsin with 1,2-epoxy-3-(*p*-nitrophenoxy)propane, an active-site directed reagent. G. Mains and T. Hofmann, 1018.

Horgen, I. A.
Purification and properties of acid phosphatase I from the cellular slime mold *Polysphondylium pallidum*. I. A. Horgen, P. A. Horgen, and D. H. O'Day, 126.

Horgen, P. A.
Purification and properties of acid phosphatase I from the cellular slime mold *Polysphondylium pallidum*. I. A. Horgen, P. A. Horgen, and D. H. O'Day, 126.

Hoy, D. J.
Lipid and temperature dependence of membrane-bound ATPase activity of *Acholeplasma laidlawii*. J.-C. Hsung, L. Huang, D. J. Hoy, and A. Haug, 974.

Hsung, J-C.
Lipid and temperature dependence of membrane-bound ATPase activity of *Acholeplasma laidlawii*. J.-C. Hsung, L. Huang, D. J. Hoy, and A. Haug, 974.

Huang, F. L.
Biosynthesis of the diguanosine nucleotides. I. Purification and properties of an enzyme from yolk platelets of brine shrimp embryos. A. H. Warner, P. C. Beers, and F. L. Huang, 231.
Biosynthesis of the diguanosine nucleotides. II. Mechanism of action of GTP:GTP guanylyltransferase on nucleotide metabolism in brine shrimp embryos. A. H. Warner and F. L. Huang, 241.

Huang, L.
Effect of fatty acyl chain length on some structural and functional parameters of *Acholeplasma* membranes. L. Huang, D. D. Jaquet, and A. Haug, 483.
Lipid and temperature dependence of membrane-bound ATPase activity of *Acholeplasma laidlawii*. J.-C. Hsung, L. Huang, D. J. Hoy, and A. Haug, 974.

Hurst, R. O.
Evaluation of the Hill coefficient for yeast aspartate transcarbamylase by nonlinear regression analysis. R. O. Hurst, 1137.

Huszti, Z.
Uptake and metabolism of histidine during stress. Z. Huszti and T. L. Sourkes, 782.

Hutcheon, W. L. B.
The 4.5 Å resolution structure of a bacterial serine protease from *Streptomyces griseus*. P. W. Codding, L. T. J. Delbaere, K. Hayakawa, W. L. B. Hutcheon, M. N. G. James, and L. Jurášek, 208.

Huterer, S.
Glycosphingolipids in secondary lysosomes prepared from rat liver. S. Huterer and J. R. Wherrett, 507.

Inglis, A.
Urinary excretion of cyclic AMP by cold-acclimated rats. M. Muirhead, A. Inglis, and J. Himms-Hagen, 414.

Ishaque, M.
Occurrence of *c*-type cytochrome in *Mycobacterium lepraemurium*. M. Ishaque and L. Kato, 991.

Jacobson, B. E.
Sarcolemmal ATPase activities in normal and BIO 14.6 dystrophic hamster skeletal muscle. K. Wrogemann, B. E. Jacobson, and M. C. Blanchaer, 500.

James, M. N. G.
The 4.5 Å resolution structure of a bacterial serine protease from *Streptomyces griseus*. P. W. Codding, L. T. J. Delbaere, K. Hayakawa, W. L. B. Hutcheon, M. N. G. James, and L. Jurášek, 208.

Jaquet, D. D.
Effect of fatty acyl chain length on some structural and functional parameters of *Acholeplasma* membranes. L. Huang, D. D. Jaquet, and A. Haug, 483.

Jato-Rodriguez, J. J.
The occurrence and properties of soluble UDP-galactose:glycoprotein galactosyltransferase in human amniotic fluid. J. D. Nelson, J. J. Jato-Rodriguez, and S. Mookerjea, 42.

Jennings, B. A.
Formation of estrogen glucosiduronates by human kidney homogenates. R. Hobkirk, R. N. Green, M. Nilsen, and B. A. Jennings, 9.
Direct conversion of 17β-estradiol-3-glucosiduronate and 17β-estradiol-3-sulfate to their 17-keto forms by human kidney homogenates. R. Hobkirk, R. N. Green, M. Nilsen, and B. A. Jennings, 15.

Jennings, H. J.
The synthesis of 2-acetamido-2-deoxy-α-D-glucopyranose 4-phosphate. D. R. Bundle and H. J. Jennings, 123.

Jobbágy, A. J.
Repression of the branched-chain amino acid biosynthetic enzymes in developing conidia and mycelia of *Neurospora*. A. J. Jobbágy and R. P. Wagner, 822.

Jobin, M.
Evaluation of three constants involved in the binding of corticosterone to plasma proteins in the rat. M. Jobin and F. Perrin, 101.

Johnson, C. E.
Regulatory properties of pyruvate kinase from liver of the summer-active Arctic ground squirrel. H. W. Behrisch and C. E. Johnson, 547.

Jolicoeur, P.
Control of RNA synthesis by amino acids in Landschutz ascites tumor cells. P. Jolicoeur and F. Labrie, 867.

Jurášek, L.
The 4.5 Å resolution structure of a bacterial serine protease from *Streptomyces griseus*. P. W. Codding, L. T. J. Delbaere, K. Hayakawa, W. L. B. Hutcheon, M. N. G. James, and L. Jurášek, 208.
The amino acid sequence of *Streptomyces griseus* trypsin. II. The tryptic peptides. L. Jurášek and L. B. Smillie, 382.

Kahlenberg, A.
Evidence for an asymmetric distribution of phospholipids in the human erythrocyte membrane. A. Kahlenberg, C. Walker, and R. Rohrlick, 803.
Studies on the mechanism and reversal of the phospholipase-A_2 inactivation of D-glucose uptake by isolated human erythrocyte membranes. B. Banjo, C. Walker, R. Rohrlick, and A. Kahlenberg, 1097.

Kalra, J.
Localization of phosphate-independent glutaminase in the brush border of rat kidney cortex. J. Kalra and J. T. Brosnan, 762.

Kaplan, H.
Diagonal chromatography for the selective purification of tyrosyl peptides. W. H. Cruickshank, B. L. Malchy, and H. Kaplan, 1013.

Kaplan, J. G.
Biosynthesis of branched-chain amino acids in *Schizosaccharomyces pombe*: regulation of the enzymes involved in isoleucine, valine, and leucine synthesis. R. A. McDonald, T. Satyanarayana, and J. G. Kaplan, 51.

Kapoor, M.
The influence of ligands on the fluorescence of the complex between 8-anilino-1-naphthalene sulfonate and pyruvate kinase of *Neurospora*. M. Kapoor, 599.

Kates, M.
Biosynthesis of nitrogenous phospholipids in spinach leaves. M. O. Marshall and M. Kates, 469.
Structural studies of bacteriorhodopsin from *Halobacterium cutirubrum* by resonance Raman spectroscopy. R. Mendelsohn, A. L. Verma, H. J. Bernstein, and M. Kates, 774.

Kato, L.
Occurrence of *c*-type cytochrome in *Mycobacterium lepraemurium*. M. Ishaque and L. Kato, 991.

Kelly, K. A.
Δ^9-Tetrahydrocannabinol–protein conjugates. P. T. Tsui, K. A. Kelly, M. M. Ponpipom, M. Strahilevitz, and A. H. Sehon, 252.

Kennedy, T. D.
Wheat-embryo ribonucleates. III. Modified nucleotide constituents in each of the 5.8S, 18S, and 26S ribonucleates. R. Y. Lau, T. D. Kennedy, and B. G. Lane, 1110.

Keradjopoulos, D.
Thermophilic alanine dehydrogenase from *Halobacterium salinarium*. D. Keradjopoulos and K. Wulff, 1033.

Kindl, H.
Chain elongation of aromatic amino acids: the role of 2-benzylmalic acid in the biosynthesis of a C_6C_4 amino acid and a C_6C_3 mustard oil glucoside. D. Dörnemann, W. Löffelhardt, and H. Kindl, 916.

Kirby, L. T.
The effects of catecholamines, glucagon, and diet on enzyme activities in brown fat and liver of the rat. P. Hahn and L. T. Kirby, 739.

Knapp, A.
Studies on the structure and formation during spermatogenesis of the sulfoglycerogalactolipid of rat testis. M. J. Kornblatt, A. Knapp, M. Levine, H. Schachter, and R. K. Murray, 689.

Kornblatt, J. A.
The conversion of cytochrome oxidase to an inactive form of the enzyme by water dialysis. J. A. Kornblatt and G. R. Williams, 1124.

Kornblatt, M. J.
Studies on the structure and formation during spermatogenesis of the sulfoglycerogalactolipid of rat testis. M. J. Kornblatt, A. Knapp, M. Levine, H. Schachter, and R. K. Murray, 689.

Krasny, J.
Characterisation of nuclear and cytoplasmic DNA polymerases from rat intestinal mucosa. R. Poulson, J. Krasny, and S. H. Zbarsky, 162.

Krebs, A.
Some physical parameters of succinyl-coenzyme A synthetase of *Escherichia coli*. A. Krebs and W. A. Bridger, 594.

Kuksis, A.
Differential effect of puromycin on triacylglycerol and phosphatidylcholine synthesis in rat mucosal microsomes. P. J. A. O'Doherty and A. Kuksis, 170.
Microsomal synthesis of di- and triacylglycerols in rat liver and Ehrlich ascites cells. P. J. A. O'Doherty and A. Kuksis, 514.
Effect of phosphatidylcholine on triacylglycerol synthesis in rat intestinal mucosa. P. J. A. O'Doherty, I. M. Yousef, and A. Kuksis, 726.
Molecular species of ethanolamine phosphatides of dog and pig kidney. S. K. F. Yeung and A. Kuksis, 830.

Labow, R. S.
The transfer of glucose to steroids by sheep liver microsomes. R. S. Labow, D. G. Williamson, and D. S. Layne, 203.

Labrie, F.
Adenosine-3′,5′-monophosphate-dependent protein kinase from bovine anterior pituitary gland. III. Structural specificity of the ATP site of the catalytic subunit. S. Lemaire, F. Labrie, and M. Gauthier, 137.
Stability of secretory granules containing growth hormone and prolactin from bovine anterior pituitary gland. A. Lemay, F. Labrie, and D. Drouin, 327.
Electrophoretic analysis of polypeptides of plasma membranes from bovine pituitary gland. A. Lemay and F. Labrie, 620.
Control of RNA synthesis by amino acids in Landschutz ascites tumor cells. P. Jolicoeur and F. Labrie, 867.

Lacoste, L.
Streptomycin resistance and ribosomal proteins: amino acid substitutions in the *str* protein of one streptomycin-resistant mutant of *Escherichia coli* K12 after mutagenesis with ethyl methanesulfonate. L. Brakier-Gingras, L. Lacoste, and G. Boileau, 304.

Lane, B. G.
Wheat-embryo ribonucleates. III. Modified nucleotide constituents in each of the 5.8S, 18S, and 26S ribonucleates. R. Y. Lau, T. D. Kennedy, and B. G. Lane, 1110.

Lanthier, A.
Effect of some steroidal compounds on the *in vitro* incorporation of acetate-1-^{14}C into digitonin precipitable sterols by slices of rat liver. V. V. Patwardhan and A. Lanthier, 28.

Lau, R. Y.
Wheat-embryo ribonucleates. III. Modified nucleotide constituents in each of the 5.8S, 18S, and 26S ribonucleates. R. Y. Lau, T. D. Kennedy, and B. G. Lane, 1110.

Layne, D. S.
The transfer of glucose to steroids by sheep liver microsomes. R. S. Labow, D. G. Williamson, and D. S. Layne, 203.
Isolation from rabbit urine of the 3-glucuronide-17-*N*-acetylglucosaminide of 17α-estradiol. C. Gwilliam, A. Paquet, D. G. Williamson, and D. S. Layne, 452.

Lee, L. P. K.
Temperature effect on the permeability of plasma membranes of advanced germinal cells of the rat testis. L. P. K. Lee, 586.

Lehoux, J.-G.
Some aspects of the dietary sodium intake on the regulation of aldosterone biosynthesis in rat adrenals. J.-G. Lehoux, T. Sandor, I. W. Henderson, and I. Chester Jones, 1.

Lemaire, S.
Adenosine-3′,5′-monophosphate-dependent protein kinase from bovine anterior pituitary gland. III. Structural specificity of the ATP site of the catalytic subunit. S. Lemaire, F. Labrie, and M. Gauthier, 137.

Lemay, A.
Stability of secretory granules containing growth hormone and prolactin from bovine anterior pituitary gland. A. Lemay, F. Labrie, and D. Drouin, 527.
Electrophoretic analysis of polypeptides of plasma membranes from bovine pituitary gland. A. Lemay and F. Labrie, 620.

Lemieux, G.
Chemical modifications of *Escherichia coli* ribosomal proteins S4, S7, and S8 in regard to their capacity for binding 16 S RNA. G. Lemieux, 1038.

Leshem, B.
The hyperglycemic effect of 1-deoxy-D-*manno*-heptulose. Inhibition of hexokinase, glucokinase, and insulin release *in vitro*. B. Leshem, Y. Sharoni, and E. Dimant, 1078.

Levine, M.
Studies on the structure and formation during spermatogenesis of the sulfoglycerogalactolipid of rat testis. M. J. Kornblatt, A. Knapp, M. Levine, H. Schachter, and R. K. Murray, 689.

Lianga, J.
Changes in seryl transfer RNA formation in developing chick muscle. M. Nwagwu and J. Lianga, 838.

Lievaart, P. A.
The isolation of trypsin and elastase from moose pancreas (*Alces alces*) by affinity chromatography on lima bean protease inhibitor – Sepharose resin. P. A. Lievaart and K. J. Stevenson, 637.

Liew, C. C.
Isolation and analysis of non-histone chromatin proteins from rat-liver nuclei by three different methods. D. Suria and C. C. Liew, 1143.

Lis, M.
Biosynthèse "*in vitro*" de l'hormone béta-lipotropique de boeuf. K. Bertagna, M. Lis, C. Gilardeau et M. Chrétien, 349.

Lo, T. C. Y.
Transport of succinate in *Escherichia coli*. III. Biochemical and genetic studies on the mechanism of transport in membrane vesicles. T. C. Y. Lo, M. K. Rayman, and B. D. Sanwal, 854.

Löffelhardt, W.
Chain elongation of aromatic amino acids: the role of 2-benzylmalic acid in the biosynthesis of a C_6C_4 amino acid and a C_6C_3 mustard oil glucoside. D. Dörnemann, W. Löffelhardt, and H. Kindl, 916.

Louie, A. J.
Enzymatic modifications of the protamines. II. Separation and characterization of phosphorylated species of protamines from trout testis. A. J. Louie and G. H. Dixon, 536.

Lusena, C. V.
DNA synthesis in isolated yeast mitochondria. L. Zeman and C. V. Lusena, 941.

Macdowall, F. D. H.
Estimation of the water of hydration in wintering wheat leaves by proton magnetic resonance. F. D. H. Macdowall and G. W. Buchanan, 652.

Maddox, I. S.
A radiolabeled assay for aldose reductase. I. S. Maddox, 807.

Madsen, N. B.
Evidence for an essential carboxyl group in glycogen phosphorylase. O. Avramovic-Zikic, W. C. Breidenbach, and N. B. Madsen, 146.

Mahley, R. W.
Incorporation of sialic acid into sialidase-treated apolipoprotein of human, very low density lipoprotein by a pork liver sialyltransferase. S. Wetmore, R. W. Mahley, W. V. Brown, and H. Schachter, 655.

Mains, G.
The inactivation of penicillopepsin with 1,2-epoxy-3-(*p*-nitrophenoxy)propane, an active-site directed reagent. G. Mains and T. Hofmann, 1018.

Malchy, B. L.
Diagonal chromatography for the selective purification of tyrosyl peptides. W. H. Cruickshank, B. L. Malchy, and H. Kaplan, 1013.

Malhotra, S. S.
Preparation and properties of purified ($Na^+ + K^+$)-stimulated mitochondrial ATPase from germinating pea seeds. S. S. Malhotra and M. Spencer, 491.
Effects of ethylene, carbon dioxide, and ethylene-carbon dioxide mixtures on the activities of "membrane-containing" and "highly purified" preparations of adenosine triphosphatase from pea-cotyledon mitochondria. S. S. Malhotra and M. Spencer, 1091.

Malkin, A.
Two cAMP-activated protein kinases from bovine thyroid. M. B. Wilson and A. Malkin, 319.

Marchant, P. J.
Phosphoribosyl pyrophosphate degradation in human tissues. I. H. Fox and P. J. Marchant, 1162.

Marquardt, R. R.
Thermal inactivation of avian liver and muscle fructose 1,6-diphosphatases in the presence of fructose 1,6-diphosphate, AMP, and divalent cations. R. R. Marquardt and J. P. Olson, 670.

Marsh, D.
Intermolecular steric interactions and lipid chain fluidity in phospholipid multibilayers. A spin label study. D. Marsh, 631.

Marshall, L.
Enzyme increase by folate and methotrexate in cultured mammalian cells. B. L. Hillcoat and L. Marshall, 1132.

Marshall, M. O.
Biosynthesis of nitrogenous phospholipids in spinach leaves. M. O. Marshall and M. Kates, 469.

Martinson, H. G.
The effect of the amount of nucleic acid load on hydroxylapatite chromatography. H. G. Martinson and E. B. Wagenaar, 267.

McConnell, W. B.
Metabolism of $Na_2{}^{75}SeO_4$ in horseradish: formation of selenosinigrin. J. M. Stewart, S. N. Nigam, and W. B. McConnell, 144.

McDonald, R. A.
Biosynthesis of branched-chain amino acids in *Schizosaccharomyces pombe*: regulation of the enzymes involved in isoleucine, valine, and leucine synthesis. R. A. McDonald, T. Satyanarayana, and J. G. Kaplan, 51.

McGeer, A.
Terminal cross-linking of DNA catalyzed by an enzyme system containing DNA ligase, DNA polymerase, and exonuclease of bacteriophage T7. P. Sadowski, A. McGeer, and A. Becker, 525.

McGirr, L. G.
γ-Glutamyl transpeptidase of rat kidney: some properties and kinetic constants. J. S. Elce, J. Bryson, and L. G. McGirr, 33.

Mendelsohn, R.
Structural studies of bacteriorhodopsin from *Halobacterium cutirubrum* by resonance Raman spectroscopy. R. Mendelsohn, A. L. Verma, H. J. Bernstein, and M. Kates, 774.

Meza, L.
Wide-angle X-ray diffraction studies of the bovine-erythrocyte membrane. Treatment with sodium chloride, deoxycholate, and lipid solvents. G. W. Dresdner, H. Cid-Dresdner, L. Meza, and E. Cardemil, 1044.

Mezon, B. J.
Differing populations of mitochondria isolated from the skeletal muscle of normal and dystrophic hamsters. B. J. Mezon, K. Wrogemann, and M. C. Blanchaer, 1024.

Miall, S. H.
Synthesis of albumin with exogenous mouse-liver messenger RNA in a homologous cell-free system. A. J. Faber, S. H. Miall, and T. Tamaoki, 429.

Michniewicz, J. J.
Multiple forms of potato spindle-tuber metavirus ribonucleic acid. R. P. Singh, J. J. Michniewicz, and S. A. Narang, 809.

Miller, C.
Time differential in labelling of different monosaccharides into serum lipoproteins in rats. S. Mookerjea and C. Miller, 767.

Mistry, S. P.
In vitro synthesis of propionyl-CoA holocarboxylase by a partially purified mitochondrial preparation from biotin-deficient chicken liver. P. N. Achuta Murthy and S. P. Mistry, 800.

Mitchell, J. C.
Reaction of alantolactone, an allergenic sesquiterpene lactone, with some amino acids. Resultant loss of immunologic reactivity. G. Dupuis, J. C. Mitchell, and G. H. N. Towers, 575.

Moger, W. H.
Steroid metabolism by the immature rat testis. W. H. Moger and D. T. Armstrong, 744.

Monahan, J. J.
The RNA fractions of chromatin from L-cells. J. J. Monahan and R. H. Hall, 922.

Mookerjea, S.
The occurrence and properties of soluble UDP-galactose: glycoprotein galactosyltransferase in human amniotic fluid. J. D. Nelson, J. J. Jato-Rodriguez, and S. Mookerjea, 42.
Glycosylation of β-lipoprotein and the possible role of choline derivatives. T. Delahunty and S. Mookerjea, 359.
Time differential in labelling of different monosaccharides into serum lipoproteins in rats. S. Mookerjea and C. Miller, 767.
A study on the effect of lysolecithin and phospholipase A on membrane-bound galactosyltransferase. S. Mookerjea and J. W. M. Yung, 1053.

Morgan, A. R.
Controlled cleavage of phage R17 RNA within the virion by treatment with ascorbate and copper (II). K. Wong, A. R. Morgan, and W. Paranchych, 950.

Muirhead, M.
Changes in the adenyl cyclase system of skeletal muscle of cold-acclimated rats. M. Muirhead and J. Himms-Hagen, 176.
Urinary excretion of cyclic AMP by cold-acclimated rats. M. Muirhead, A. Inglis, and J. Himms-Hagen, 414.

Murray, R. K.
Studies on the structure and formation during spermatogenesis of the sulfoglycerogalactolipid of rat testis. M. J. Kornblatt, A. Knapp, M. Levine, H. Schachter, and R. K. Murray, 689.
Electrophoretic studies of the proteins of rat liver endoplasmic reticulum. D. J. Bailey, R. K. Murray, and F. S. Rolleston, 1003.

Murthy, V. K.
Inhibition of lipogenesis by cyclic AMP without altered lipolysis. V. K. Murthy and G. Steiner, 259.

Narang, S. A.
Multiple forms of potato spindle-tuber metavirus ribonucleic acid. R. P. Singh, J. J. Michniewicz, and S. A. Narang, 809.

Nelson, J. D.
The occurrence and properties of soluble UDP-galactose:glycoprotein galactosyltransferase in human amniotic fluid. J. D. Nelson, J. J. Jato-Rodriguez, and S. Mookerjea, 42.

Ngo, T. T.
The enzymatic synthesis of L-cysteine in higher plant tissues. T. T. Ngo and P. D. Shargool, 435.

Nigam, S. N.
Metabolism of $Na_2{}^{75}SeO_4$ in horseradish: formation of selenosinigrin. J. M. Stewart, S. N. Nigam, and W. B. McConnell, 144.

Nilsen, M.
Formation of estrogen glucosiduronates by human kidney homogenates. R. Hobkirk, R. N. Green, M. Nilsen, and B. A. Jennings, 9.
Direct conversion of 17β-estradiol-3-glucosiduronate and 17β-estradiol-3-sulfate to their 17-keto forms by human kidney homogenates. R. Hobkirk, R. N. Green, M. Nilsen, and B. A. Jennings, 15.

Nishimoto, H.
Template specificity and subunits of RNA polymerase from asporogenous mutants of *Bacillus subtilis*. H. Nishimoto and I. Takahashi, 966.

Nwagwu, M.
Changes in seryl transfer RNA formation in developing chick muscle. M. Nwagwu and J. Lianga, 838.

O'Day, D. H.
Purification and properties of acid phosphatase I from the cellular slime mold *Polysphondylium pallidum*. I. A. Horgen, P. A. Horgen, and D. H. O'Day, 126.

O'Doherty, P. J. A.
Differential effect of puromycin on triacylglycerol and phosphatidylcholine synthesis in rat mucosal microsomes. P. J. A. O'Doherty and A. Kuksis, 170.

Microsomal synthesis of di- and triacylglycerols in rat liver and Ehrlich ascites cells. P. J. A. O'Doherty and A. Kuksis, 514.
Effect of phosphatidylcholine on triacylglycerol synthesis in rat intestinal mucosa. P. J. A. O'Doherty, I. M. Yousef, and A. Kuksis, 726.

Olafsson, P. G.
A comparative study of the relative ease of thermolytic depurination *vs.* depyrimidination in 2'-deoxynucleosides. P. G. Olafsson, A. M. Bryan, G. C. Davis, and S. Anderson, 997.

Olson, J. P.
Thermal inactivation of avian liver and muscle fructose 1,6-diphosphatases in the presence of fructose 1,6-diphosphate, AMP, and divalent cations. R. R. Marquardt and J. P. Olson, 670.

Paquet, A.
Isolation from rabbit urine of the 3-glucuronide-17-*N*-acetylglucosaminide of 17α-estradiol. C. Gwilliam, A. Paquet, D. G. Williamson, and D. S. Layne, 452.

Paranchych, W.
Controlled cleavage of phage R17 RNA within the virion by treatment with ascorbate and copper (II). K. Wong, A. R. Morgan, and W. Paranchych, 950.

Park, W. K.
Synthesis of peptides by the solid phase method. I. Tetradecapeptide renin substrate and intermediate peptides, nonapeptides, and fragments of angiotensin II. W. K. Park, C. Choi, F. Rioux, and D. Regoli, 106.
Synthesis of peptides with the solid phase method. II. Octapeptide analogues of angiotensin II. W. K. Park, C. Choi, F. Rioux, and D. Regoli, 113.

Patwardhan, V. V.
Effect of some steroidal compounds on the *in vitro* incorporation of acetate-1-^{14}C into digitonin precipitable sterols by slices of rat liver. V. V. Patwardhan and A. Lanthier, 28.

Percy, M. E.
An atypical human immunoglobulin G with deletions in both heavy and light chains. Studies of the conformation and the *in vitro* recombination of the isolated subunits. M. E. Percy and K. J. Dorrington, 610.

Perrin, F.
Evaluation of three constants involved in the binding of corticosterone to plasma proteins in the rat. M. Jobin and F. Perrin, 101.

Philips, S. R.
Identification and distribution of *p*-tyramine in the rat. S. R. Philips, D. A. Durden, and A. A. Boulton, 366.
Identification and distribution of tryptamine in the rat. S. R. Philips, D. A. Durden, and A. A. Boulton, 447.

Phillippe, L.
Metabolism and transport of purine nucleosides by membrane preparations of *Micrococcus sodonensis*. M. A. Pickard, L. Phillippe, and J. N. Campbell, 83.

Pickard, M. A.
Metabolism and transport of purine nucleosides by membrane preparations of *Micrococcus sodonensis*. M. A. Pickard, L. Phillippe, and J. N. Campbell, 83.

Polglase, W. J.
Properties of P503 (Prototetrahydroporphyrin IX) in cells and extracts of *Saccharomyces cerevisiae*. R. Poulson, J. Boon, and W. J. Polglase, 21.

Ponpipom, M. M.
Δ^9-Tetrahydrocannabinol–protein conjugates. P. T. Tsui, K. A. Kelly, M. M. Ponpipom, M. Strahilevitz, and A. H. Sehon, 252.

Poulson, R.
Properties of P503 (Prototetrahydroporphyrin IX) in cells and extracts of *Saccharomyces cerevisiae*. R. Poulson, J. Boon, and W. J. Polglase, 21.
Characterisation of nuclear and cytoplasmic DNA polymerases from rat intestinal mucosa. R. Poulson, J. Krasny, and S. H. Zbarsky, 162.

Quastel, J. H.
Fifty years of biochemistry. A personal account. J. H. Quastel, 71.
Erratum: Fifty years of biochemistry. A personal account. J. H. Quastel, 433.

Rayman, M. K.
Transport of succinate in *Escherichia coli*. III. Biochemical and genetic studies on the mechansim of transport in membrane vesicles. T. C. Y. Lo, M. K. Rayman, and B. D. Sanwal, 854.

Regoeczi, E.
Studies of the metabolism of asialotransferrins: potentiation of the catabolism of human asialotransferrin in the rabbit. E. Regoeczi, M. W. C. Hatton, and K.-L. Wong, 155.
Studies of the metabolism of asialotransferrins: the mechanism for the hypercatabolism of human asialotransferrin in the rabbit. E. Regoeczi and M. W. C. Hatton, 645.
Studies of the metabolism of asialotransferrins: relationship between the carbohydrate composition of bovine, canine, and porcine asialotransferrins and their metabolic behavior in the rabbit. M. W. C. Hatton, E. Regoeczi, and K.-L. Wong, 845.

Regoli, D.
Synthesis of peptides by the solid phase method. I. Tetradecapeptide renin substrate and intermediate peptides, nonapeptides, and fragments of angiotensin II. W. K. Park, C. Choi, F. Rioux, and D. Regoli, 106.
Synthesis of peptides with the solid phase method. II. Octapeptide analogues of angiotensin II. W. K. Park, C. Choi, F. Rioux, and D. Regoli, 113.

Rioux, F.
Synthesis of peptides by the solid phase method. I. Tetradecapeptide renin substrate and intermediate peptides, nonapeptides, and fragments of angiotensin II. W. K. Park, C. Choi, F. Rioux, and D. Regoli, 106.
Synthesis of peptides with the solid phase method. II. Octapeptide analogues of angiotensin II. W. K. Park, C. Choi, F. Rioux, and D. Regoli, 113.

Robin, J.
Replicating DNA of adenovirus type 2. D. Bourgaux-Ramoisy, J. Robin, and P. Bourgaux, 181.

Roche, R. S.
Physicochemical properties of thermomycolase, the thermostable, extracellular, serine protease of the fungus *Malbranchea pulchella*. G. Voordouw, G. M. Gaucher, and R. S. Roche, 981.

Rohrlick, R.
Evidence for an asymmetric distribution of phospholipids in the human erythrocyte membrane. A. Kahlenberg, C. Walker, and R. Rohrlick, 803.
Studies on the mechanism and reversal of the phospholipase-A_2 inactivation of D-glucose uptake by isolated human erythrocyte membranes. B. Banjo, C. Walker, R. Rohrlick, and A. Kahlenberg, 1097.

Rolleston, F. S.
Electrophoretic studies of the proteins of rat liver endoplasmic reticulum. D. J. Bailey, R. K. Murray, and F. S. Rolleston, 1003.

Roncari, D. A. K.
Mammalian fatty acid synthetase. I. Purification and properties of human liver complex. D. A. K. Roncari, 221.

Rossi, A.
Conversion of pig prothrombin into thrombin: amino acid composition of the active enzyme. A. Rossi and J. R. Giglio, 336.

Rubinstein, D.
Some characteristics of the exchange of lecithin between rabbit erythrocytes and serum. N. Smith and D. Rubinstein, 706.

Sadowski, P.
Terminal cross-linking of DNA catalyzed by an enzyme system containing DNA ligase, DNA polymerase, and exonuclease of bacteriophage T7. P. Sadowski, A. McGeer, and A. Becker, 525.

Sandor, T.
Some aspects of the dietary sodium intake on the regulation of aldosterone biosynthesis in rat adrenals. J.-G. Lehoux, T. Sandor, I. W. Henderson, and I. Chester Jones, 1.

Sanwal, B. D.
Transport of succinate in *Escherichia coli*. III. Biochemical and genetic studies on the mechanism of transport in membrane vesicles. T. C. Y. Lo, M. K. Rayman, and B. D. Sanwal, 854.

Satyanarayana, T.
Biosynthesis of branched-chain amino acids in *Schizosaccharomyces pombe*: regulation of the enzymes involved in isoleucine, valine, and leucine synthesis. R. A. McDonald, T. Satyanarayana, and J. G. Kaplan, 51.

Schachter, H.
Incorporation of sialic acid into sialidase-treated apolipoprotein of human, very low density lipoprotein by a pork liver sialyltransferase. S. Wetmore, R. W. Mahley, W. V. Brown, and H. Schachter, 655.
Studies on the structure and formation during spermatogenesis of the sulfoglycerogalactolipid of rat testis. M. J. Kornblatt, A. Knapp, M. Levine, H. Schachter, and R. K. Murray, 689.

Schiller, C. M.
Control of fatty acid synthesis in white adipose tissue by insulin: coordination between mitochondrial citrate transporter and pyruvate dehydrogenase. C. M. Schiller, W. M. Taylor, and M. L. Halperin, 813.

Schneider, E. A.
Amino acid metabolism in plants. V. Changes in basic indole compounds and the development of tryptophan decarboxylase activity in barley (*Hordeum vulgare*) during germination and seedling growth. E. A. Schneider and F. Wightman, 698.

Schreier-Muccillo, S.
Biosynthesis of spin-labelled lipids and their use in the study of biological membranes: isolation and characterization of membrane-bound spin-labelled *sn*-3-phosphatidic acid-2-^{3}H prepared by enzymatic incorporation of spin-labelled stearic acid into *sn*-glycero-3-phosphate-2-^{3}H. N. Z. Stanacev, L. Stuhne-Sekalec, S. Schreier-Muccillo, and I. C. P. Smith, 884.

Schubert, H.
Correction to the amino acid sequence of porcine motilin. H. Schubert and J. C. Brown, 7.

Schulman, H. M.
Evidence that ferrihemoglobin may function as an intracellular heme carrier in reticulocytes. H. M. Schulman, 665.

Senon, A. H.
Δ^{9}-Tetrahydrocannabinol–protein conjugates. P. T. Tsui, K. A. Kelly, M. M. Ponpipom, M. Strahilevitz, and A. H. Senon, 252.

Seligy, V. L.
The interaction of ethidium bromide with synthetic polydeoxyribonucleic acids. Effect of base composition and sequence on the induced circular dichroism spectra. R. E. Williams and V. L. Seligy, 281.

Shargool, P. D.
The enzymatic synthesis of L-cysteine in higher plant tissues. T. T. Ngo and P. D. Shargool, 435.

Sharoni, Y.
The hyperglycemic effect of 1-deoxy-D-*manno*-heptulose. Inhibition of hexokinase, glucokinase, and insulin release *in vitro*. B. Leshem, Y. Sharoni, and E. Dimant, 1078.

Shepherd, M. G.
Succinate dehydrogenases of *Mucor rouxii* and *Penicillium duponti*. V. Boonsaeng, P. A. Sullivan, and M. G. Shepherd, 751.

Singh, R. P.
Multiple forms of potato spindle-tuber metavirus ribonucleic acid. R. P. Singh, J. J. Michniewicz, and S. A. Narang, 809.

Smillie, L. B.
The amino acid sequence of *Streptomyces griseus* trypsin. II. The tryptic peptides. L. Jurášek and L. B. Smillie, 382.

Smith, I. C. P.
Biosynthesis of spin-labelled lipids and their use in the study of biological membranes: isolation and characterization of membrane-bound spin-labelled *sn*-3-phosphatidic acid-2-^{3}H prepared by enzymatic incorporation of spin-labelled stearic acid into *sn*-glycero-3-phosphate-2-^{3}H. N. Z. Stanacev, L. Stuhne-Sekalec, S. Schreier-Muccillo, and I. C. P. Smith, 884.

Smith, N.
Some characteristics of the exchange of lecithin between rabbit erythrocytes and serum. N. Smith and D. Rubenstein, 706.

Smith, O. C.
Biological activity of ribose-modified N^{6}-(Δ^{2}-isopentenyl)adenosine derivative. C. M. Chen, O. C. Smith, and G. F. Hartnell, 1154.

Snyder, F. F.
Effects of actinomycin D on purine ribonucleotide metabolism in Ehrlich ascites tumor cells *in vitro*. F. F. Snyder and J. F. Henderson, 263.

Sourkes, T. L.
Uptake and metabolism of histidine during stress. Z. Huszti and T. L. Sourkes, 782.

Spencer, M.
Preparation and properties of purified ($Na^{+} + K^{+}$)-stimulated mitochondrial ATPase from germinating pea seeds. S. S. Malhotra and M. Spencer, 491.
Effects of ethylene, carbon dioxide, and ethylene-carbon dioxide mixtures on the activities of "membrane-containing" and "highly purified" preparations of adenosine triphosphatase from pea-cotyledon mitochondria. S. S. Malhotra and M. Spencer, 1091.

Spenser, I. D.
Erratum: Biosynthesis of vitamin B_{6}. Incorporation of terminally labelled glucose. R. E. Hill and I. D. Spenser, 271.

Stanacev, N. Z.
Biosynthesis of spin-labelled lipids and their use in the study of biological membranes: isolation and characterization of membrane-bound spin-labelled *sn*-3-phosphatidic acid-2-^{3}H prepared by enzymatic incorporation of spin-labelled stearic acid into *sn*-glycero-3-phosphate-2-^{3}H. N. Z. Stanacev, L. Stuhne-Sekalec, S. Schreier-Muccillo, and I. C. P. Smith, 884.
Evidence for the biosynthetic difference between isolated mitochondria and microsomes from guinea-pig and rat liver regarding lysophosphatidic acid, phosphatidic acid, CDP-diglyceride, phosphatidylglycerol, and cardiolipin. J. B. Davidson and N. Z. Stanacev, 936.

Steiner, G.
Inhibition of lipogenesis by cyclic AMP without altered lipolysis. V. K. Murthy and G. Steiner, 259.

Stevenson, K. J.
Amino acid analyses of chymotrypsin-like proteases from the sea anemone (*Metridium senile*). K. J. Stevenson, D. Gibson, and G. H. Dixon, 93.
The isolation of trypsin and elastase from moose pancreas (*Alces alces*) by affinity chromatography on lima-bean protease inhibitor – Sepharose resin. P. A. Lievaart and K. J. Stevenson, 637.

Stewart, J. M.
Metabolism of $Na_2{}^{75}SeO_4$ in horseradish: formation of selenosinigrin. J. M. Stewart, S. N. Nigam, and W. B. McConnell, 144.

Stocco, D. M.
Metabolism of acid-soluble nucleotides in starved–refed synchronized *Tetrahymena pyriformis* GL. D. M. Stocco and A. M. Zimmerman, 310.

Strahilevitz, M.
Δ^9-Tetrahydrocannabinol–protein conjugates P. T. Tsui, K. A. Kelly, M. M. Ponpipom, M. Strahilevitz, and A. H. Sehon, 252.

Stuart, A. L.
Autoreduction of pure spinach cytochrome *f*: a light-dependent process inhibited by 3-(3,4-dichlorophenyl)-1,1-dimethyl urea. H. S. Garewal, A. L. Stuart, and A. R. Wasserman, 67.

Stuhne-Sekalec, L.
Biosynthesis of spin-labelled lipids and their use in the study of biological membranes: isolation and characterization of membrane-bound spin-labelled *sn*-3-phosphatidic acid-2-^{3}H prepared by enzymatic incorporation of spin-labelled stearic acid into *sn*-glycero-3-phosphate-2-^{3}H. N. Z. Stanacev, L. Stuhne-Sekalec, S. Schreier-Muccillo, and I. C. P. Smith, 884.

Sullivan, P. A.
Succinate dehydrogenases of *Mucor rouxii* and *Penicillium duponti*. V. Boonsaeng, P. A. Sullivan, and M. G. Shepherd, 751.

Suria, D.
Isolation and analysis of non-histone chromatin proteins from rat-liver nuclei by three different methods. D. Suria and C. C. Liew, 1143.

Takahashi, I.
Template specificity and subunits of RNA polymerase from asporogenous mutants of *Bacillus subtilis*. N. Nishimoto and I. Takahashi, 966.

Tamaoki, T.
Synthesis of albumin with exogenous mouse-liver messenger RNA in a homologous cell-free system. A. J. Faber, S. H. Miall, and T. Tamaoki, 429.

Taylor, W. M.
Control of fatty acid synthesis in white adipose tissue by insulin: coordination between mitochondrial citrate transporter and pyruvate dehydrogenate. C. M. Schiller, W. M. Taylor, and M. L. Halperin, 813.

Towers, G. H. N.
Reaction of alantolactone, an allergenic sesquiterpene lactone, with some amino acids. Resultant loss of immunologic reactivity. G. Dupuis, J. C. Mitchell, and G. H. N. Towers, 575.

Trevithick, J. R.
Nuclear proteins during development: incorporation of leucine into histones of rainbow trout during early development. J. R. Trevithick, 393.
Patterns of incorporation of [^{32}P]orthophosphate and [^{3}H]acetate into histones of rainbow trout during early development. J. R. Trevithick, 399.
Patterns of incorporation of [^{3}H]leucine and [^{32}P]orthophosphate into nonhistone proteins of rainbow trout during early development. J. R. Trevithick, 406.

Tsui, P. T.
Δ^9-Tetrahydrocannabinol–protein conjugates. P. T. Tsui, K. A. Kelly, M. M. Ponpipom, M. Strahilevitz, and A. H. Sehon, 252.

Tucker, E. B.
The site of protein synthesis in the moss *Tortula ruralis* on recovery from desiccation. E. B. Tucker and J. D. Bewley, 345.

Tung, A. T.
Glucagon biosynthesis in avian pancreatic islets: evidence for medium-sized biosynthetic intermediates. A. T. Tung, 1081.

Vale, W.
Isolation of somatostatin (a somatotropin release inhibiting factor) of ovine hypothalamic origin. P. Brazeau, W. Vale, R. Guillemin, and R. Burgus, 1067.

Verma, A. L.
Structural studies of bacteriorhodopsin from *Halobacterium cutirubrum* by resonance Raman spectroscopy. R. Mendelsohn, A. L. Verma, H. J. Bernstein, and M. Kates, 774.

Verpoorte, J. A.
Circular dichroism spectra of DNA of high adenine plus thymine content. C. W. Helleiner and J. A. Verpoorte, 582.

Voordouw, G.
Physicochemical properties of thermomycolase, the thermostable, extracellular, serine protease of the fungus *Malbranchea pulchella*. G. Voordouw, G. M. Gucher, and R. S. Roche, 981.

Wagenaar, E. B.
The effect of the amount of nucleic acid load on hydroxylapatite chromatography. H. G. Martinson and E. B. Wagenaar, 267.

Wagner, R. P.

Repression of the branched-chain amino acid biosynthetic enzymes in developing conidia and mycelia of *Neurospora*. A. J. Jobbágy and R. P. Wagner, 822.

Wainwright, S. D.
Development of hydroxytryptophan decarboxylase activity in the pineal gland, cerebral hemispheres, and cerebellum of the chick embryo and young chick. S. D. Wainwright, 149.

Walker, C.
Evidence for an asymmetric distribution of phospholipids in the human erythrocyte membrane. A. Kahlenberg, C. Walker, and R. Rohrlick, 803.
Studies on the mechanism and reversal of the phospholipase-A_2 inactivation of D-glucose uptake by isolated human erythrocyte membranes. B. Banjo, C. Walker, R. Rohrlick, and A. Kahlenberg, 1097.

Warner, A. H.
Biosynthesis of the diguanosine nucleotides. I. Purification and properties of an enzyme from yolk platelets of brine shrimp embryos. A. H. Warner, P. C. Beers, and F. L. Huang, 231.
Biosynthesis of the diguanosine nucleotides. II. Mechanism of action of GTP:GTP guanylyltransferase on nucleotide metabolism in brine shrimp embryos. A. H. Warner and F. L. Huang, 241.

Wasserman, A. R.
Autoreduction of pure spinach cytochrome *f*: a light-dependent process inhibited by 3-(3,4-dichlorophenyl)-1,1-dimethyl urea. H. S. Garewal, A. L. Stuart, and A. R. Wasserman, 67.

Wassermann, G. F.
Protein kinases in testes of adult and prepuberal rats. E. A. Bernard and G. F. Wassermann, 563.

Wells, J. A.
Catalysis of exchange of oxygen into and out of L-leucine by leucine aminopeptidase. J. A. Wells, G. L. Glasser, and F. H. Carpenter, 142.

Wetmore, S.
Incorporation of sialic acid into sialidase-treated apolipoprotein of human, very low density lipoprotein by a pork liver sialyltransferase. S. Wetmore, R. W. Mahley, W. V. Brown, and H. Schachter, 655.

Wherrett, J. R.
Glycosphingolipids in secondary lysosomes prepared from rat liver. S. Huterer and J. R. Wherrett, 507.

Whitty, C. D.
A cytokinin oxidase in *Zea mays*. C. D. Whitty and R. H. Hall, 789.

Wightman, F.
Amino acid metabolism in plants. V. Changes in basic indole compounds and the development of tryptophan decarboxylase activity in barley (*Hordeum vulgare*) during germination and seedling growth. A. E. Schneider and F. Wightman, 698.

Williams, G. R.
The conversion of cytochrome oxidase to an inactive form of the enzyme by water dialysis. J. A. Kornblatt and G. R. Williams, 1124.

Williams, R. E.
The interaction of ethidium bromide with synthetic polydeoxyribonucleic acids. Effect of base composition and sequence on the induced circular dichroism spectra. R. E. Williams and V. L. Seligy, 281.

Williamson, D. G.
The separation and partial purification of the soluble 17α- and 17β-hydroxysteroid dehydrogenases of rabbit liver. S. Hasnain and D. G. Williamson, 120.
The transfer of glucose to steroids by sheep liver microsomes. R. S. Labow, D. G. Williamson, and D. S. Layne, 203.
Isolation from rabbit urine of the 3-glucuronide-17-*N*-acetylglucosaminide of 17α-estradiol. C. Gwilliam, A. Paquet, D. G. Williamson, and D. S. Layne, 452.

Wilson, M. B.
Two cAMP-activated protein kinases from bovine thyroid. M. B. Wilson and A. Malkin, 319.

Wong, K.
Controlled cleavage of phage R17 RNA within the virion by treatment with ascorbate and copper (II). K. Wong, A. R. Morgan, and W. Paranchych, 950.

Wong, K.-L.
Studies of the metabolism of asialotransferrins: potentiation of the catabolism of human asialotransferrin in the rabbit. E. Regoeczi, M. W. C. Hatton, and K.-L. Wong, 155.
Studies of the metabolism of asialotransferrins: relationship between the carbohydrate composition of bovine, canine, and porcine asialotransferrins and their metabolic behavior in the rabbit. M. W. C. Hatton, E. Regoeczi, and K.-L. Wong, 845.

Wong, M. D.
Studies on corticosterone–receptor complexes from mouse placenta. M. D. Wong and A. F. Burton, 190.

Wrogemann, K.
Sarcolemmal ATPase activities in normal and BIO 14.6 dystrophic hamster skeletal muscle. K. Wrogemann, B. E. Jacobson, and M. C. Blanchaer, 500.
Differing populations of mitochondria isolated from the skeletal muscle of normal and dystrophic hamsters. B. J. Mezon, K. Wrogemann, and M. C. Blanchaer, 1024.

Wu, P. H.
Distribution, metabolism, and disappearance of intraventricularly injected *p*-tyramine in the rat. P. H. Wu and A. A. Boulton, 374.

Wulff, K.
Thermophilic alanine dehydrogenase from *Halobacterium salinarium*. D. Keradjopoulos and K. Wulff, 1033.

Yeung, S. K. F.
Molecular species of ethanolamine phosphatides of dog and pig kidney. S. K. F. Yeung and A. Kuksis, 830.

Yip, C. C.
The identification of proinsulin-synthesizing polysomes in fetal bovine pancreas. C.-L. Hew and C. C. Yip, 959.

Young, N. M.
The resonance Raman spectrum of the metalloprotein ovotransferrin. P. R. Carey and N. M. Young, 273.

Young, P. G.
The decay of *Xenopus laevis* mitochondrial rRNA in the presence of ethidium bromide or actinomycin D. P. G. Young and A. M. Zimmerman, 911.

Yousef, I. M.
Effect of phosphatidylcholine on triacylglycerol synthesis in rat intestinal mucosa. P. J. A. O'Doherty, I. M. Yousef, and A. Kuksis, 726.

Yung, J. W. M.
A study on the effect of lysolecithin and phospholipase A on membrane-bound galactosyltransferase. S. Mookerjea and J. W. M. Yung, 1053.

Zbarsky, S. H.
Characterisation of nuclear and cytoplasmic DNA polymerases from rat intestinal mucosa. R. Poulson, J. Krasny, and S. H. Zbarsky, 162.

Zeman, L.
DNA synthesis in isolated yeast mitochondria. L. Zeman and C. V. Lusena, 941.

Zimmerman, A. M.
Metabolism of acid-soluble nucleotides in starved–refed synchronized *Tetrahymena pyriformis* GL. D. M. Stocco and A. M. Zimmerman, 310.
The decay of *Xenopus laevis* mitochondrial rRNA in the presence of ethidium bromide or actinomycin D. P. G. Young and A. M. Zimmerman, 911.

CANADIAN JOURNAL OF BIOCHEMISTRY / JOURNAL CANADIEN DE BIOCHIMIE

VOLUME 52

SUBJECT INDEX/INDEX DES MATIÈRES

The last four digits in the number opposite each entry contain the initial page number of the paper.

Les quatre derniers chiffres à droite indiquent le numéro de la première page de l'article.
